

DataSheet

Dry Powder fire extinguishers are highly effective and truly multi-purpose. With some impressive fire ratings, they are able to tackle nearly all types of fire, including direct use on live electrical equipment. Unlike foam extinguishers, they can be used on 'running' flammable liquid fires.

POWDER FIRE EXTINGUISHERS

Spaces that benefit from having a powder extinguisher on site include workshops, garage forecourts and construction sites. This type of extinguisher isn't suitable for enclosed spaces due to the fact the powder can easily be inhaled and the residue left behind can be difficult to clean up.

| Technical Specification | DP6E |
|-------------------------|---------------------|
| Capacity | 6kg |
| Fire Rating | 43A 233B C |
| Extinguishing Medium | FUREX S ABC |
| Working Pressure | 15 bar at temp 20°C |
| Temperature Range | +30-+60°C |
| Cylinder Material | Steel |
| Pressuring Gas | Nitrogen |
