

DataSheet

Effective fire alarm systems supports with the protection of people, property and assets.

Issue an effective warning in the event of a fire with the CommandALERT and aid safe evacuation.

COMMANDALERT SITE ALARM

With its incredible 115dB alarm, the CommandALERT can be heard loud and clear in the noisiest of environments across a distance of 150m in open air.

To further support raising the alarm in time of emergency, the CommandALERT also gives off a vibrant red flash every 2 seconds and can be easily seen even in broad daylight.

Manufactured from ABS plastic, the alarm can sufficiently withstand harsh outdoor weather conditions and is completely waterproof. A hinged door and simple installation process make this a fuss-free solution to your fire safety equipment requirements.

The CommandAlert Wireless Site Alarm features a radio-link module that allows you to link up to 12 units wirelessly, meaning all will sound when one is triggered. The radio 'meshing' technology means that no control panel is required and the alarms will talk to each other.

PRODUCT CODE

AE25/W CommandAlert Wireless Alarm

PRODUCT GROUP

Alarm Equipment

DIMENSIONS (mm) (width x height x diameter)

170 x 250 x 80 (including activation button and strobe/siren unit)

WEIGHT

670 grams

- Extremely loud 115dB siren
- 12-LED super-bright strobe
- IP65 rated
- ABS case resists shocks and drops
- Simple fitting and operation
- Radio link module available
