

# DataSheet

This Mobile Fire Point Stand is another versatile solution. It's much bigger than the standard trolleys, and will hold up to four extinguishers.

It is designed to be fitted with a range of ancillary equipment and options, including alarm equipment, first aid equipment and eye wash stations, fire and safety signage, notices and plans, branding... the list is endless!

## FIRE POINT STAND

Large nylon wheels on the back mean that the stand can be moved easily and quickly when required.

Supplied empty without extinguishers and accessories as shown (right).

- Space for up to four extinguishers
- Two wheels to facilitate positioning and moving
- Extremely robust and weather resistant
- The steel strap and lipped base hold extinguishers safely on the stand whilst moving
- The backboard measures a massive 650 x 1,200mm
- Large steel backboard allows fitting of an unlimited combination of ancillaries, including alarm equipment, signage, first aid equipment, branding, site plans...

Due to the nature of how busy construction sites become during projects, it's extremely important that all fire safety equipment is easily identified and accessible at all times. We also understand that as premises change or projects develop, fire safety equipment will need to be moved around accordingly.

The design of our fire point stands ensure that all relevant fire safety equipment is both stored efficiently and easily transportable, offering the utmost practicality.
