

Rapid-10

Rapid response sanitiser

RAPID KILL RATIO UP TO **99.9-99.99%**

What is Rapid-10 with Fluid Science?

Rapid-10 with Fluid Science produces high-performance sanitisation of all types of hard surfaces, suitable for food preparation surfaces. Our Anti-Viral Surface Disinfectant has been laboratory tested against "enveloped" viruses similar to COVID-19 and achieved 99.9-99.99% kill ratio across the testing range.

The easiest way to Sanitise areas large or small, ideal for any area that needs sanitising, no need for any power or compressed air source.

Rapid-10 is eco-friendly, due to the all natural formulation process, with active biological ingredients used as opposed to alcohol.

Our natural ingredients are readily biodegradable and have no aquatic toxicity, thus they offer a greener alternative to conventional alcohol products and minimise environmental impact.

Multi-surfactant combination: Ensures highly effective cleaning. Also includes a natural scale control package that is highly-effective at reducing scales associated with hard water.

Use on emergency vehicles, trains, buses, trucks, offices or warehouse areas.

TESTED AND PROVEN IN THE REAL WORLD

Rapid-10 with Fluid Science:

Our Anti-Viral Disinfectant kills 99.9% of similar 'enveloped' viruses in under 5 minutes. As such our leading scientific teams have tested our products against several of these viruses: HERPES-Simplex 1, H1N1, HIV, Hepatitis B

These viruses have a comparable viral envelope structure and our product achieved a 99.9% kill ratio and even up to 99.99% on certain strains. In addition, our active ingredient is proven to have known virocidal activity vs the SARS corona virus (SARS-CoV) variant.

Contact

Technical Specification	
Capacity	6 litre
Medium	Sanitiser
Working Pressure	14 bar
Temperature Range	+5 -+60 C
Cylinder Material	Steel
Pressuring Gas	Nitrogen

Covers 550 Square Meters - Per Re-fill (6 Litre)
Droplet size 10-100 microns 0.01-0.1mm

DIMENSIONS (mm) (height x width x diameter)	WEIGHT
60601: 550 x 310 x 165	60601: 10kg
Available in 3 Litres and 100 Litres - call 01443 741999	

Simple - Long lasting - Re-fillable - Rapid Drying

Our simple and long lasting system is completely re-fillable with a rapid drying time of under 10 minutes, can be fastened securely with a handy strap and covers an approximate area between 250 and 300 square meters, our solution is non staining and safe for light spraying on electrical surfaces such as a keyboard or mouse.

Our system is safe for indoor use making it the ideal solution for all office spaces, vehicle interiors and other response vehicles.

Biocidal effectiveness in compliance with the following standards: Modified DIN EN1040, Modified DIN EN1276, EN1276, and EN 14776* (*Anti-Viral solution only).

Our Sanitisation product requires no hazard labelling, reducing requirement for PPE and COSHH. Manufactured in accordance with recognised international standards, ISO 9001 and ISO 14001, ensures consistent quality of product.

This disinfectant produces high-performance sanitisation of all types of hard surfaces, suitable for food surfaces. All our products have been stringently tested and verified according to the European Standard EN 1040, EN 1276 High performance sanitiser solution is suitable for use on most surfaces, to remove potentially harmful infectious bacteria.

Precautionary Statements
P280 Wear protective gloves/protective clothing/eye protection/face protection. P302 + P352

BS EN 1276 & BS EN 14476 accredited.

Discharge time of up to 30 minutes
Total weight - 10kg
